HACK OR BE HACKED

September 25 - 28, Hotel Mona Plaza, Belgrade

Dear Colleagues,

<u>Welcome to our Seventh eSecurity Conference!</u>

The international eSecurity Conference is one of the most significant IT events in the region, which gathers a large number of experts in the field of information security. Every year the conference brings a big number of educators, hands-on demonstrations, workshops that are about present threats, sophisticated attack methods, digital life, the internet of things, as well as advanced defence systems.

The eSecurity Conference follows the latest trends in the field of information security. The presentations on the conference are grouped into panels. A section of the presentations is dedicated to **banking security** and includes **electronic and mobile payments**, **payment cards security**, as well as new trends of payment, **blockchain technology** and digital currency. There will be presentations specially dedicated to information system security, standards and regulations, **mobile device security and the internet of things (IoT)**. Additionally, there will be talk about **social engineering**, phishing attacks and the unavoidable **ransomware threats**. Also, our friends will talk about the topics that come after the problem: **digital forensics, data recovery systems and backups**.

On the first day of the conference, there will be **workshops (hands-on training) that teach ethical hacking, digital forensics and blockchain security**. The workshops are dedicated to people who want to know what and how something is attacking them and also how to detect the attacks and stop them from spreading.

Our attendees are mostly IT managers, information security managers, experts in the field of cyber-crime and digital forensics etc.

Meeting new people and socializing is a big aspect of the conference. During three days of the our conference you will be able to spend quality time exchanging experiences and knowledge with experts from different companies.

In addition to lectures, **the conference includes a dinner and similar socializing activities.**

seif.ai

Your Cybersecurity Partner for Complete Peace of Mind

In the cybersecurity world, one weak link can trigger chaos. Seif makes sure that never happens by covering all your assets, at all times.

Continuous cybersecurity across all assets

Employee security

Human error is the catalyst for over 90% of cyberattacks. Seif.ai revolutionizes your employees' resilience to these attacks. Your data is off-limits. Stand your ground.

IT Infrastructure

Your IT setup is vast - hardware, software, networks. Gain full visibility, control, and insights to bolster defenses, closing any openings for attackers.

Supply Chain Security

54% of companies had data theft due to partner cybersecurity gaps. Seif.ai offers timely alerts and harmonizing security practices across your business ecosystem. With us, your supply chain becomes a strong defense, not a weakness.

Governance, Regulations & Compliance

Seif.ai streamlines reporting and paperwork, ensuring your business maintains continuous alignment with all major regulations.

WHY Seif.ai?

- We're not just a voice on a call; we're there with you in person whenever you need help. Our local presence guarantees a reliable partner for prompt and effective cybersecurity solutions.

- We've got all your security needs under one roof. Say goodbye to managing multiple vendors and streamline your security operations with us.

- We seamlessly weave our solutions into your existing infrastructure from day one, with zero disruption to your day-to-day operations.

- Your budget matters to us. That's why we offer pricing that's adaptable to your specific needs and expectations. Seif.ai is your cost-effective cybersecurity partner.

Join a special one-on-one cybersecurity strategy session with Mikica Ivošević.

CLICO VAD (Value Added Distributor) is a leading IT distributor in Central Eastern Europe (CEE) specializing in the fields of cyber security, networking, and management. Founded in 1991 in Krakow (Poland), CLICO now employs over 150 business and IT experts. With a proven track record of delivering IT solutions and services that help reduce business complexities and costs, we are a trusted technology partner to small, medium and enterprise businesses.

CLICO SEE was founded in 2015 and as a part of CLICO Group, represents one of the Southeastern Europe largest IT distribution companies with over 1.000 satisfied customers. We are a provider of market-leading and best-in-class products from the area of cyber security, networking and management while providing the highest quality of sales and technical support. Partnering with technology leaders such as *Arista, Juniper, SonicWall, SailPoint, Cyber Ark, Rapid7, Splunk, SentinelOne, Netskope, Forcepoint, Imperva, Forescout, Solarwinds, Tufin, Vectra, Recorded Future, Mandiant, Rubrik, Acronis, Ivanti, Infinera and many others*, CLICO SEE ensures that our partners and customers receive the best IT products and knowledge transfer on the market.

Solutions map

IT SYSTEM REFERENCE ARCHITECTURE

We provide you with a solutions map developed by CLICO experts to help you choose solutions in network and IT security that meet high quality and reliability requirements. The scope of the study covers all the main elements of the modern ICT system.

Security Orchestration, Automation and Response (SOAR)

Mikica Ivošević

Ethical Hacker and Google Hall Of Fame Member

Let's dig into Security Orchestration, Automation and Response together. This workshop will help attendance to learn more about SOAR and how to protect organization with automated security.

Module 1 — Security Automation, Orchestration, and Response (SOAR)

Module 2 — Understanding the Benefits of SOAR

Module 3 — Implementing SOAR in Your Organization

Module 4 — Real-world Use Cases and Success Stories

eSecurity Conference 2023, Belgrade

15:00	**REAL-WORLD USE CASES AND SUCCESS STORIES**
16:30	**Q&A**

## Forcepoint Secure Access Service Edge (SASE)

In 2019, Gartner proposed a new IT architecture, Secure Access Service Edge (SASE), bringing security and networking together, managed and often delivered as services from the cloud. Connectivity products such as firewalls, routers, intrusion prevention systems and application-centric networking have already begun to converge into a new generation of unified SD-WAN solutions. Similarly, SASE architectures make it easier for security gateways to apply policies for Zero Trust-based threat protection and data security consistently across web (SWG), cloud (CASB) and private application (ZTNA) access. Gartner subsequently started referring to this unified approach to security as Security Service Edge (SSE). Forcepoint was one of the first proponents of the SASE architecture. It represents many of the principles and technologies we helped pioneer for connecting and protecting distributed businesses and government agencies. Forcepoint goes beyond just securing access to business resources – we safeguard the ongoing usage of sensitive data everywhere, from the endpoint through the cloud. We call this approach Data-first SASE.
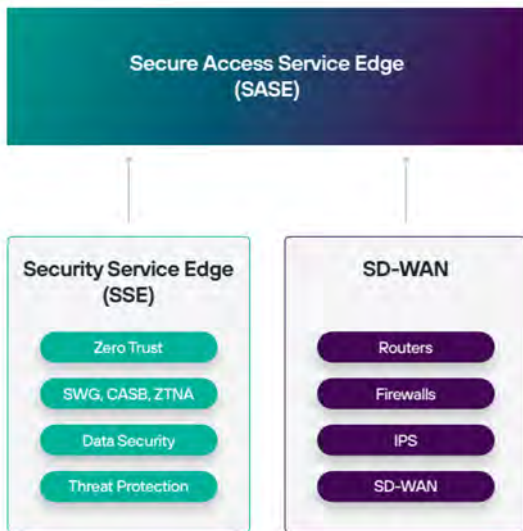

Singularity ENDPOINT

SentinelOne™

Enterprise security teams face multiple challenges when attempting to detect, investigate and remediate an advanced attack. Lack of visibility into critical control points, manual searches through large and disparate data sources that lack context and correlation, alert fatigue from poor signal to noise ratio, and difficulty containing the attack quickly disrupt business-critical processes, impact productivity and increase operating costs. Sentinel One ActiveEDR™ is an advanced EDR and threat hunting solution that delivers real-time visibility with contextualized, correlated insights accelerating triaging and root cause analysis. The solution lightens the SOC burden with automated threat resolution, dramatically reducing the mean time to remediate (MTTR) the incident. ActiveEDR enables proactive hunting capabilities to uncover stealthy, sophisticated threats lurking in the environment. ActiveEDR, powered by Sentinel One's patented Storyline technology, provides analysts with real-time, actionable correlation and context, and lets security analysts understand the full story of what happened in their environment.

DAY 1

Tuesday, September 26th, 2023

08:10   **WELCOME COFFEE AND REGISTRATION**

08:50   Opening Ceremony
Igor Franc, PhD
President of eSecurity Association

09:15   Mastering Cybersecurity Puzzle: Uniting Multi-Layer Defence for Fun
Srđan Radosavljević

Cyber attacks prevented today.

Just another day of
Security In Action.

checkpoint.com/action

Estimate based on average calculation from ThreatCloud AI
May 2023, an AI-powered threat intelligence engine that
makes over 2 billion security decisions daily allowing us to
provide accurate prevention in under 2 seconds to hundreds
of millions of enforcement points worldwide. We'd say more
but...you get the point.

CHECK POINT™
YOU DESERVE THE BEST SECURITY

SIEM + SOAR 01

Defending your enterprise comes with great responsibility. With intuitive, high-performance analytics and a seamless incident response workflow, your team will uncover threats faster, mitigate risks more efficiently, and produce measurable results.
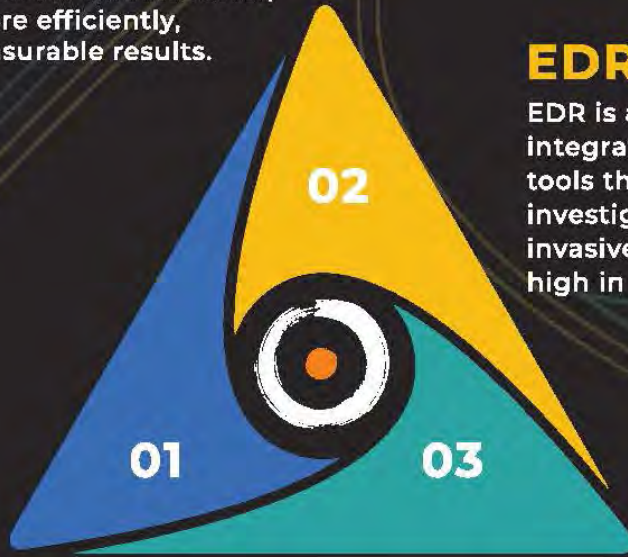

EDR 02

EDR is an array of modern, integrated endpoint security tools that detect, contain, investigate, and eliminate invasive cybersecurity threats high in the cyber kill chain.

NDR 03

The network is the most powerful source of truth and transparency across all assets in your enterprise—from cloud, to on-premises, to endpoints. It sees everything, shows everything and leaves attackers with nowhere to hide.

DAY 2

Wednesday, September 27th, 2023

08:10   **WELCOME COFFEE AND REGISTRATION**

08:50   The start of the second day

09:00   Sooner or Later, You'll Have to Pay — A Real Phishing Incident
Luka Milinković
Security, Governance and Risk Manager at **Symphony**

09:30   How to Detect Cyber-Attacks Faster and More Accurately Using Artificial Intelligence
Nikola Mijajlović, *Cyber security analyst* at **Oktacron**

10:00   Multi-Engine Network Detection and Response for Efficient Threat Hunting (**Mondist & Gatewatcher**)
Pawel Rybczyk
Area Sales Manager for CEE/CIS Region at **Gatewatcher**

10:30   **COFFEE TIME**

10:50   Security Assessment — What? How? Why?
Nemanja Petrović
Cyber Security Consultant at **SECIT**

11:20   Have You Heard About DNS DR? How This Can Shift Your Security from Responsive to Proactive!
Jan Rynes, *Solution Architect* at **Infoblox**

11:50   **PANEL DISCUSSION**
INFORMATION SECURITY REGULATION — NEW AND UPDATED REQUIREMENTS
Moderator: Sanja Kekić, *President* at **Women4Cyber Serbia**
Vesna kolarević, *Manager in IT Consulting* at **Ernst and Young**
speaker, *position* at **company**
speaker, *position* at **company**

DAY 2

Wednesday, September 27th, 2023

12:30 **COFFEE TIME**

12:50 tbd
speaker
position at **Comtrade System Integration**

13:20 Digital Operational Resilience Testing through TIBER-EU Framework
Jovan Bogićević, *Senior Manager, Cybersecurity Services*
Strahinja Soskić, *Senior Consultant, Cybersecurity Services*
Ernst and Young

13:50 Cyber Security Layers by Clico
Dragomir Jevtić
Regional Manager Adriatics at **Clico**

14:00 Forcepoint SASE — More Than Good Enough
Mikolaj Pigon
Territory Account Manager, SEE, CIS & Baltics at **Forcepoint**

14:30 **LUNCH TIME**

15:15 DORA NIS2 — From Bone to Soft Tissue
Mane Piperevski
Cyber Security Researcher, CEO at **Piperevski & Associates**

16:00 AI in Production — Risks and Best Practices
Nikola Markovinović
Information Security Architect at **Eurofins GSC**

16:45 **CLOSING CEREMONY**

Growth. Transformation. Can you achieve either without risk?

EY Building a better working world

EY Cybersecurity services

EY Cybersecurity enables trust in systems, design and data, so organizations can take on more of the right risk, make transformational change, and enable innovation with confidence.

EY Cyber Services

Cyber strategy, risk, compliance and resilience:
▸ Cyber governance
▸ IT Infrastructure security and IT risk management
▸ Cyber program assessment

Architecture engineering and emerging tech:
▸ Cloud security
▸ IOT/OT Security
▸ SAP Security
▸ SDLC & CI/CD security
▸ Microservice security
▸ Web3 security

Next generation security operations and response:
▸ Application Security
▸ Blue teaming
▸ Red teaming
▸ Threat detection and threat hunting
▸ Vulnerability management
▸ Security automation

20+ years of developing industry leaders in cybersecurity

Over **11,000** people working on cybersecurity and IT risk...

...of which over **7,000** are full time information/ cybersecurity SMRs

63 cybersecurity centres globally across **150** countries

Strong local presence with more than **20** Cybersecurity services delivered by Local Cybersecurity Consultants in Serbia, Bosnia and Hercegovina and Montenegro

850+ partners
