Zaštitite se od curenja lozinki zauvek

U 2023. godini, preduzeća širom sveta su bila svedoci ogromnog broja curenja lozinki usled aktivnosti programa za krađu informacija. **Da li ste i vi u riziku?**

- **15 miliona** sistema zaraženo je malverom za krađu informacija u 2023. godin
- **Porast od 32%** u procentu zaraženih korporativnih korisnika u poslednje tri godine
- **443.000** veb sajtova je imalo kompromise kredencijala u poslednjih pet godina
- **21%** zaposlenih ponovo aktivira malver na svom sistemu

Broj je ažuriran u avgustu 2024. jer je skoro dostigao ukupan broj koji smo predvideli za 2023.

Redline

je najaktivniji infostealer. Svaki drugi uređaj (55%) bio je zaražen ovim malverom.

Lumma

- U 2023. godini beleži rastuću popularnost kao novi stealer.

Zanima vas da li su kredencijali uređaja ili veb aplikacija vaše kompanije kompromitovani od strane infostealera? Skenirajte QR kod a naši stručnjaci će analizirati dark web tržište za bilo koje potencijalne pretnje koje su specifično relevantne za vaše poslovanje. Ne čekajte napad—upoznajte se sa svojim rizicima odmah.

Skenirajte QR kod i proverite sigurnost vaše kompanije:

HACK OR BE HACKED

October 7 - 10, Hotel Mona Plaza, Belgrade

Dear Colleagues,

Welcome to our Eight eSecurity Conference!

The international eSecurity Conference is one of the most significant IT events in the region, which gathers a large number of experts in the field of information security. Every year the conference brings a big number of educators, hands-on demonstrations, workshops that are about present threats, sophisticated attack methods, digital life, the internet of things, as well as advanced defence systems.

The eSecurity Conference follows the latest trends in the field of information security. The presentations on the conference are grouped into panels. A section of the presentations is dedicated to **banking security** and includes **electronic and mobile payments**, **payment cards security**, as well as new trends of payment, **blockchain technology** and digital currency. There will be presentations specially dedicated to information system security, standards and regulations, **mobile device security and the internet of things (IoT)**. Additionally, there will be talk about **social engineering**, phishing attacks and the unavoidable **ransomware threats**. Also, our friends will talk about the topics that come after the problem: **digital forensics, data recovery systems and backups**.

On the first day of the conference, there will be **workshops (hands-on training) that teach ethical hacking, digital forensics and blockchain security**. The workshops are dedicated to people who want to know what and how something is attacking them and also how to detect the attacks and stop them from spreading.
Our attendees are mostly IT managers, information security managers, experts in the field of cyber-crime and digital forensics etc.

Meeting new people and socializing is a big aspect of the conference. During three days of the our conference you will be able to spend quality time exchanging experiences and knowledge with experts from different companies.

In addition to lectures, **the conference includes a dinner and similar socializing activities.**

#ACK OR BE #ACKED — CTF GAME
powered by
CPP Services

CTF Game on eSecurity

Capture the flag game: Hack or be hacked, is starting. And this time it is **powered by CPP Services**.

Together with our friends from CPP Services we prepared:
- **WarmUp challenges** that will be published on Conference Website from May until October
- **Two day hands-on challenges** with the CTF environment especially designed by CPP Services for our Conference

An idea of this game is to train our black-hat thinking, and our skills with different security tools, but also to have fun and be in contact.

First five colleagues that manage to finish all WarmUp challenges will get free Conference tickets. And CPP Services prepared great prices for those that manage to solve the puzzle on the Conference.

Follow HoBH page in our Website for all the details about registration and the game itself.

#ACK4LIFE HANDS-ON TRAINING

Monday, October 7th, 2024

C2 Threat Hunting

Aleksandar Mirković

Cyber Security Consultant @ **SECIT SECURITY**

Through this hands-on training, you will gain practical knowledge in threat hunting, with a special focus on the identification and analysis of Command and Control (C2) servers. Participants will learn through hands-on activities how to identify and neutralize threats that utilize C2 infrastructure for attacks.

Participants will master the basic threat hunting techniques aimed at identifying C2 servers using Network Detection and Response (NDR) tools. The workshop will cover key aspects of tool installation and configuration, PCAP file import, and demonstrate concrete techniques for network traffic analysis.

Module 1 — Introduction to Threat Hunting and C2 Servers
Module 2 — Tool Installation and Configuration, Data Import and Analysis
Module 3 — Identification of C2 Communications
Module 4 — Advanced NDR Techniques and Hands-on Practice

Prerequisites: Basic knowledge of network protocols. Experience with network traffic analysis tools (e.g., Wireshark, Zeek/Bro, or similar) is preferred. A laptop with at least 16GB RAM, an i5 processor, and 100GB of disk space is required.

Expected outcomes: Participants will be equipped with practical knowledge for identifying and analysing C2 activities in network traffic. They will be able to apply the learned techniques in their daily professional tasks to more effectively protect their organizations from advanced threats.

ZERO DAY

Monday, October 7th, 2024

seif.ai

Your Cybersecurity Partner for Complete Peace of Mind

In the cybersecurity world, one weak link can trigger chaos. Seif makes sure that never happens by covering all your assets, at all times.

Continuous cybersecurity across all assets

Employee security

Human error is the catalyst for over 90% of cyberattacks. Seif.ai revolutionizes your employees' resilience to these attacks. Your data is off-limits. Stand your ground.

IT Infrastructure

Your IT setup is vast - hardware, software, networks. Gain full visibility, control, and insights to bolster defenses, closing any openings for attackers.

Supply Chain Security

54% of companies had data theft due to partner cybersecurity gaps. Seif.ai offers timely alerts and harmonizing security practices across your business ecosystem. With us, your supply chain becomes a strong defense, not a weakness.

Governance, Regulations & Compliance

Seif.ai streamlines reporting and paperwork, ensuring your business maintains continuous alignment with all major regulations.

WHY Seif.ai?

- We're not just a voice on a call; we're there with you in person whenever you need help. Our local presence guarantees a reliable partner for prompt and effective cybersecurity solutions.

- We've got all your security needs under one roof. Say goodbye to managing multiple vendors and streamline your security operations with us.

- We seamlessly weave our solutions into your existing infrastructure from day one, with zero disruption to your day-to-day operations.

- Your budget matters to us. That's why we offer pricing that's adaptable to your specific needs and expectations. Seif.ai is your cost-effective cybersecurity partner.

Join a special one-on-one cybersecurity strategy session with Mikica Ivošević.

DAY 1

Tuesday, October 8th, 2024

08:10   WELCOME COFFEE AND REGISTRATION

08:45   Opening Ceremony
Igor Franc, PhD
President @ eSecurity Association

09:05   Keynote Speech
Milan Vojvodić, *Head of Regulatory Affairs, Information Society and Information Security Sector @* **Ministry of Information and Telecommunications**

09:20   Step on Quicksands - How to Detect Darkweb Threats
Yuliya Novikova
Head of Digital Footprint Intelligence @ **Kaspersky**

10:00   Trend Vision One - Way Cybersecurity Platform?
Comtrade Distribution & Trend Micro
Bojan Milovanović, *Sales Engineer @* **Trend Micro**

10:30   COFFEE TIME

10:50   AI Driven Security Operation
Božidar Belić
Service Director @ **Crayon**

11:20   The Evolution of Network Security: Embracing SASE for Modern Enterprises
Ivan Štrbac
Lead Security Engineer @ **Check Point**

11:50   PANEL DISCUSSION - THE IMPACT AND CHALLENGES OF THE NEW LAW ON INFORMATION SECURITY AND INTERNATIONAL DIRECTIVES
Moderator: Aleksandar Mirković, *Group Security Execution Lead @* **A1 Telekom Austria Group**

Milan Vojvodić, *Head of Regulatory Affairs, Information Society and Information Security Sector @* **Ministry of Information and Telecommunications**
Ana Milovanović, *Regulatory Reform Manager @* **NALED**

Growth. Transformation. Can you achieve either without risk?

EY
Building a better working world

EY Cybersecurity services

EY Cybersecurity enables trust in systems, design and data, so organizations can take on more of the right risk, make transformational change, and enable innovation with confidence.

EY Cyber Services

Cyber strategy, risk, compliance and resilience:
▸ Cyber governance
▸ IT Infrastructure security and IT risk management
▸ Cyber program assessment

Architecture engineering and emerging tech:
▸ Cloud security
▸ IOT/OT Security
▸ SAP Security
▸ SDLC & CI/CD security
▸ Microservice security
▸ Web3 security

Next generation security operations and response:
▸ Application Security
▸ Blue teaming
▸ Red teaming
▸ Threat detection and threat hunting
▸ Vulnerability management
▸ Security automation

20+ years of developing industry leaders in cybersecurity

Over **11,000** people working on cybersecurity and IT risk...

...of which over **7,000** are full time information/ cybersecurity SMRs

63 cybersecurity centres globally across **150** countries

Strong local presence with more than **20** Cybersecurity services delivered by Local Cybersecurity Consultants in Serbia, Bosnia and Hercegovina and Montenegro

850+ partners
