Belgrade

kaspersky bring on
the future

Industrial cybersecurity that lets your enterprise thrive

Kaspersky Industrial CyberSecurity is an extended detection and response (XDR) platform certified to protect different levels of automation systems.

It's hard on cyberthreats, easy on processes and provides a holistic approach to OT cybersecurity.

HACK OR BE HACKED

September 29 - October 2, Hotel Mona Plaza, Belgrade

Dear Colleagues,

[Welcome to our Ninth eSecurity Conference!](#)

The **international eSecurity Conference** is one of the most significant IT events in the region, which gathers a large number of experts in the field of information security. Every year the conference brings a big number of educators, hands-on demonstrations, workshops that are about present threats, sophisticated attack methods, digital life, the internet of things, as well as advanced defence systems.

The **eSecurity Conference** follows the latest trends in the field of information security. The presentations on the conference are grouped into panels. A section of the presentations is dedicated to **banking security** and includes **electronic and mobile payments**, **payment cards security**, as well as new trends of payment, **blockchain technology** and digital currency. There will be presentations specially dedicated to information system security, standards and regulations, **mobile device security and the internet of things (IoT)**. Additionally, there will be talk about **social engineering**, phishing attacks and the unavoidable **ransomware threats**. Also, our friends will talk about the topics that come after the problem: **digital forensics**, **data recovery systems and backups**.

On the first day of the conference, there will be **workshops (hands-on training) that teach ethical hacking, digital forensics and blockchain security**. The workshops are dedicated to people who want to know what and how something is attacking them and also how to detect the attacks and stop them from spreading.

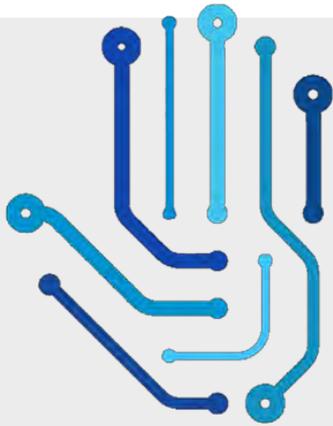

Our attendees are mostly IT managers, information security managers, experts in the field of cyber-crime and digital forensics etc.

Meeting new people and socializing is a big aspect of the conference. During three days of the our conference you will be able to spend quality time exchanging experiences and knowledge with experts from different companies.

In addition to lectures, **the conference includes a dinner and similar socializing activities**.

eSecurity Conference 2025, Belgrade

AI-Powered Enterprise Cybersecurity Platform

- Unify visibility across all assets
- Eliminate blind spots with continuous, real-time attack surface monitoring
- Prioritize threats by business impact with intelligent risk scoring
- Predict and neutralize threats with AI-driven insights and attack path analysis
- Automate remediation, reduce mean time to response, and mean time to update

- Unify visibility across XDR, SIEM, and SOAR
- Leverage modern, low-cost technology designed for the digital age with fast setup and seamless data integration
- Use AI to understand data intent and reduce manual rules with the Trend Micro LLM Advantage
- Tap into the first AI SIEM with native sensors, filling visibility gaps a SIEM cannot cover

Cyber Risk Exposure Management

Security Operations

Threat Intelligence

Services

- Detect emerging and targeted threats with context-rich intelligence curated by 450+ global researchers
- Understand attacker behavior, motivations, and targets to proactively strengthen defenses
- Prioritize and respond faster with integrated insights, sandbox analysis, and automated IoC sweeping

- Extend your security team with 24/7 experts for continuous threat monitoring and response
- Accelerate risk reduction and get prioritized board-ready insights with cyber risk advisory
- Detect, investigate, and respond faster with managed detection and response (MDR)
- Simulate real-world attacks to test defenses with red and purple teaming

#ACK OR BE #ACKED

3 eSecurity Games

The Ultimate Server Challenge

I am
**SUPER
ADMIN**

All eSecurity participants conference will have the opportunity to show and prove that they are capable of assembling a server and putting it into operation in a short time. This is an invitation specifically for you, future super admins, to put together a server with all your components at the conference itself and win the prizes we have prepared for you.

We have prepared a DELL rack server, which needs to be opened and correctly arranged two processors with coolers, fill memory slots and install two hard drives.

We have prepared prizes for all those who will compete, and for the three participants who will be the fastest, i.e. in the shortest time, there will be special prizes.

We wish everyone a clear brain and fast fingers during the competition!

Competition rules:

- Each conference participant can participate in the competition only once.
- The competition is organized during the two days of the conference.
- A competitor who damages a server or a component is obliged to replace it with a suitable one, or to take it with him title Black Grand Prix Admin.

#ACK OR BE #ACKED

3 eSecurity Games

Cisco NGFW Speed Challenge

I am
**SUPER
ADMIN**

For the first time at the eSecurity conference, a competition in quick configuration of Cisco NGFW.

All conference participants have the opportunity to try to configure the firewall according to the assigned task. This is the invitation specifically for you, future super admins, to show your knowledge at the conference itself and win the prizes we have prepared for you.

We have prepared a Cisco FirePower 1000 series that you need to configure so that it is ready to use.

We have prepared appropriate gifts for all those who will compete, and prizes and trophies will follow for the three participants who will make the correct configurations.

We wish everyone success in the competition!

Competition rules:

- Each conference participant can participate in the competition only once.
- The competition is organized during the two days of the conference.

#ACK OR BE #ACKED

3 eSecurity Games

Hack the Globe/World

Hack The Globe/World is a capture the flag contest developed and organized by TESSA Security (formerly CPP Services) where individuals will compete to answer questions in a “free-for-all” style quiz related to the CyberSecurity field and industry. Everyone will compete against everyone else individually.

Questions will range from best practices to technical details, points are gained from correctly answered questions within the given time range. The quiz will get harder as the CTF progresses, harder questions will net you more points.

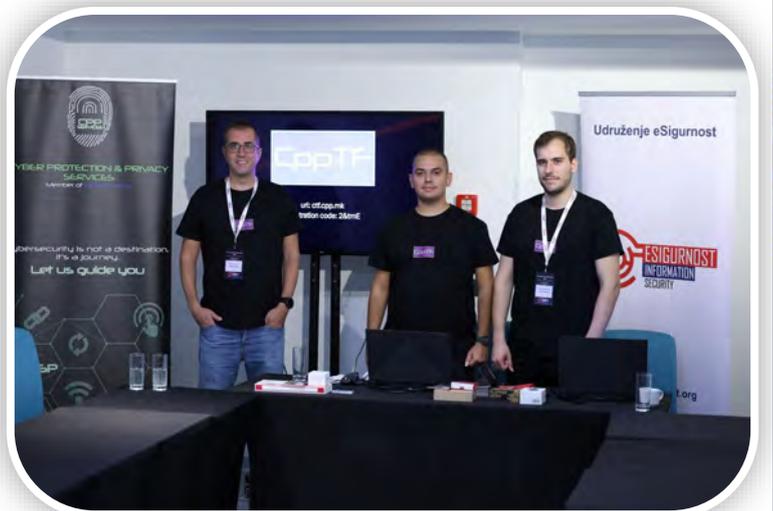

Through this challenge we hope to further your interest in the field of cybersecurity so you can hopefully learn and grow into the industry in the future.

Roles for access:

- Each Participant must register with email and nickname on the platform <https://ctf.cpp.mk>

Following actions are prohibited, unless explicitly told otherwise by event Admins.

- No cooperation between teams with independent accounts. Sharing of keys or providing revealing hints to other teams is cheating, don't do it.
- No attacking the competition infrastructure. If bugs or vulns are found, please alert the competition organizers immediately.
- Absolutely no sabotaging of other competing teams, or in any way hindering their independent progress.
- No brute forcing of challenge flag/ keys against the scoring site.
- DoSing the CTF platform or any of the challenges is forbidden.
- By participating in the contest, you agree to release Tessa Security and its employees, and the hosting organization from any and all liability, claims or actions of any kind whatsoever for injuries, damages or losses to persons and property which may be sustained in connection with the contest. You acknowledge and agree that Tessa Security et al is not responsible for technical, hardware or software failures, or other errors or problems which may occur in connection with the contest.
- If you have any questions about what is or is not allowed, please ask an organizer.

Cisco Security

Innovating where security meets the network

The **Cisco Security Reference Architecture** provides an overview of the Cisco Security portfolio, commonly deployed use cases, and the recommended capabilities within an integrated architecture.

Cisco Security vision

Unify network and security to deliver powerful protection for your users, workloads, devices, and things—wherever they are.

The five main components of the reference architecture are:

- Security cloud platform
- Security operations center
- User/device security
- Cloud edge and on-premises networks
- Workload and application security

Cisco Secure Firewall

Industry's First Fully Integrated, Threat-Focused Next-Generation Firewall

Universal ZTNA from Cisco

Zero Trust Everywhere.
Zero friction. Zero imposters.
Zero downtime.

Cisco ThousandEyes

Detect issues faster, understand impact, and validate fixes with visibility and control from user to cloud—across both owned and unowned networks

Cisco Duo

Empower users to stop identity-based attacks with a security-first identity and access management solution built to protect against unauthorized access and breaches.

#ACK4LIFE HANDS-ON TRAINING

Monday, September 29th, 2025

Threat Intelligence: Mapping the Attacker's Infrastructure

Aleksandar Mirković, Senior Cyber Security Specialist

This one-day **#ACK4LIFE Hands-On Training** gives you the opportunity to acquire practical and immediately applicable knowledge in the field of Cyber Threat Intelligence (CTI) in a short time.

Through real-world examples and hands-on workshops, you will learn how attackers build and hide their infrastructure, and how to identify and connect it into a coherent whole – before it can harm your organization.

What do you get with this course?

- Understanding the key principles of Cyber Threat Intelligence
- Insight into how attackers think and act
- Practical techniques for discovering and mapping infrastructure
- Tools and methodologies used by professional CTI teams
- Specific skills that you can immediately apply in your work

Topics we cover:

- Basics of CTI - strategic, operational and tactical level
- Data sources - OSINT, darknet forums, commercial feeds
- Frameworks and models - MITER ATT&CK, Diamond Model
- Infrastructure mapping - domains, IP addresses, C2 servers, hosting patterns
- Analysis and search tools - Maltego, Shodan, PassiveTotal, VirusTotal...
- Standards for data exchange - STIX/TAXII and integration in SIEM/SOC

ZERO DAY - Šonda 4

Tuesday, September 30th, 2025

08:10 WELCOME COFFEE AND REGISTRATION

08:50 Opening Ceremony
Igor Franc, PhD
President of **eSecurity Association**

09:15 AI-Powered Phishing on Steroids - Threat Landscape Overview
Rade Furtula
Presales Manager @ **Kaspersky**

10:00 Cyber Risk - Are You Managing It?
Comtrade Distribution & Trend Micro
Bojan Milovanović
Sales Engineer @ **Trend Micro**

10:30 COFFEE TIME

10:50 Power the SOC of the Future - Cisco XDR + Splunk
Comtrade Distribution & Cisco
Dragan Novaković
Security Solutions Engineer @ **Cisco**

11:20 How Intelligence-Led Security Puts You in Control and Enables Proactive Defense
Ivan Ivković
Presales Engineer @ **Group IB**

11:50 PANEL DISCUSSION - CYBERSECURITY RISK MANAGEMENT IN 2025: PREPARING FOR THE UNKNOWN

Moderator: **Luka Milinković**, Security, Governance and Risk Manager @ **Symphony**
Aleksandar Pavlović, Regional Sales Manager @ **Cisco**
Nemanja Miljković, Chief Information Officer @ **HORISEN**
Branka Sušić Nikolić, Director of the Information Security Sector
@ **Generali Insurance Serbia**

Group-IB's core mission - Fight against cybercrime

Our cybersecurity, anti-fraud and brand protection solutions are powered by intelligence-driven technologies and the exceptional human proficiency of our experts.

Contact us at m.knuplez@group-ib.com to find your solutions.

EY Serbia Cybersecurity services

Our **Information Security Consulting Services** helps organizations manage information security risk, improve performance and enable change. For more than 30 years, our clients have benefited from a portfolio of professional services in assessment, remediation, design, and implementation of effective enterprise security solutions. EY brings together a team of industry, security and risk management professionals with experience meeting the complex needs of organizations.

Our services

- Offensive security
-
- Security engineering, Architecture and governance
-
- Security operations
-
- Cyber awareness and education

DAY 1

Tuesday, September 30th, 2025

12:30 COFFEE TIME

13:00 Turning Silent Data into a Shield of Actionable Intelligence
Mikica Ivošević
Ethical Hacker and Google Hall Of Fame Member @ [Abstract](#)

13:30 Secure Document Flow within the Organization
Digitron-ist & Brother
Dimitar Hadzhiev
Technical Service Manager @ [Brother](#)

14:00 One Data Lake to Rule Them All (or Not)
Ivan Dragaš
Group Manager Information Security @ [SR Technics Group](#)

14:30 LUNCH TIME

15:15 Phishing Exposed: From Discovery to Takedown
Kristijan Angelovski
Red Team Lead and Threat Intelligence Expert @ [TESSA Security](#)
Filip Simeonov
CEO and Cyber Security Expert @ [TESSA Security](#)

16:00 Smart Defense: Artificial Intelligence at the Service of Threat Intelligence
Aleksandar Mirković
Senior Cyber Security Specialist @ [Secit Security](#)

DAY 2

Wednesday, October 1st, 2025

08:10 WELCOME COFFEE AND REGISTRATION

08:50 The start of the second day

09:00 Through the Looking Glass: Tracking a Jun 2025 Sharepoint 0-day, Before the World Knew

Vladan Todorović

Director @ Advanced Security Technologies

09:45 Unmasking Deception: Behavioural Psychology Meets Cyber Security

Goran Kojić

*Chief Expert in Forensic Psychological Analysis and Polygraph Examinations
@ National Center of Criminal Forensic, Ministry of Interior, Republic of Serbia*

10:30 COFFEE TIME

10:50 From Threats to Insights: Cyber Threat Intelligence in Practice

Miloš Skalušević

Senior Security Engineer @ Clico

11:20 Guardians and Impostors: AI's Double Role in Cybersecurity

Aleksandar Linc-Đorđević

Managing Director @ DSC

11:50 PANEL DISCUSSION - DEEFAKE, AI, AND IDENTITY FRAUD: IS TRUST IN DIGITAL IDENTITY DEAD?

Moderator: **Aleksandar Linc-Đorđević**, *Managing Director @ DSC*

Srđan Simović, *Director of Operations @ DCT*

Dragan Pleskonjić, *Founder & CEO @ GLOG.AI*

Ana Milovanović, *Head of Digitalization Unit @ NALED*

Nenad Bogunović, *Chief Inspector at the Service for Combating Cybercrime
@ MOI SERBIA*

Tražite vrhunske performanse za štampanje i skeniranje?

Izaberite Brother Light rešenja

Sa novim Brother rešenjima dobijate maksimalnu sigurnost i poboljšanje efikasnosti. Light Solutions su jednostavna i brza za instalaciju da odmah nadogradite svoj multifunkcionalni uređaj.

Secure Print+ je rešenje za upravljanje štampanjem koje pomaže kompanijama da zaštite važne dokumente i poboljšaju bezbednost štampanja.

- Pokraće se sa Brother uređaja. Nije potreban PC ili server
- Radi sa internim NFC čitačem ili sa eksternim čitačima kartica
- Kontrola štampanja/skeniranja/kopiranja/slanja faksa

Secure Print+
Jednostavno upravljanje štampanjem & bezbednošću

Korisnički interfejs omogućava personalizovanje ekrana osetljivog na dodir prema zahtevima korisnika.

- Stvorite sigurne, korisnički proverene radne procese prema individualnim potrebama vaših korisnika.
- Mogu se dodati pozadine i brendiranje.
- Ikoniće se mogu dodati ili ukloniti.

Brother Solutions Interface (BSI)

Kompletna kompatibilnost kada vam je to potrebno

Da bi olakšali kancelarijski posao, naši proizvodi su kompatibilni sa širokim spektrom uređaja sa tržišta kao i sistemima za upravljanje dokumentima. Sve je to deo našeg potpuno zaokruženog pristupa da bi učinili vaš posao boljim.

Naši superiorni proizvodi za štampanje rade rame uz rame sa kvalitetnim softverom kako bi sve radilo glatko. Dakle, nema trošenja vašeg vremena na probleme nekompatibilnosti ili neefikasnosti pitanja.

Takođe radimo sa brojnim drugim programerima u cilju stvaranja inovativnih rešenja za naše štampače.

Prilagodeni korisnički interfejs
Personalizovani ekran osetljiv na dodir & prilagodeni radni procesi

Digitron ist d.o.o.; Mala pruga 12a, 11080 Zemun; prodaja@digitron-ist.co.rs; +381 11 6140 300

Powered by AI and Cybersecurity Best Practices

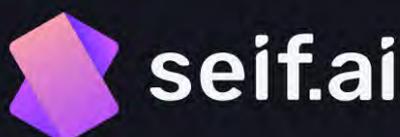

Transform your assessment data pipelines into real-time telemetry with our advanced adaptive learning algorithm. Our tailored operations and technologies deliver precise results that match your specific cybersecurity needs. Streamline your security processes with us today

Automated simulations of real-life hacker attacks

Contextual scanning of vulnerabilities, devoid of false positives

Identifying employee phishing proneness

DAY 2

Wednesday, October 1st, 2025

12:30 COFFEE TIME

13:00 Cybersecurity Resilience Transformation

Jovan Bogićević, Senior Manager, Cybersecurity lead for Serbia, Bosnia and Hercegovina, Montenegro @ **Ernst and Young**

13:30 From Regulation to Resilience: EU AI Act and the Path to Secure-by-Design AI

Igor Simovski
Lead Cyber Security Architect @ **Resideo**

14:00 DARSOC - Complete Protection, Tailored to Your Needs!

Veljko Bjelić
SOC Analyst @ **DARSOC**

14:15 eSecurity Games

The Ultimate Server Challenge
Cisco NGFW Speed Challenge
Hack the Globe/World

14:30 LUNCH TIME

15:15 Glog.AI - From Reactive to Predictive: Architecting the Future of AI-Driven Cybersecurity

Dragan Pleskonjić, Founder & CEO @ **GLOG.AI**
Vladimir Jelić, CTO @ **GLOG.AI**

16:00 Mastering Microsoft Defender for Vulnerability Management: From Discovery to Remediation

Uroš Babić
Cybersecurity expert, Microsoft Security MVP, MCT

16:45 CLOSING CEREMONY

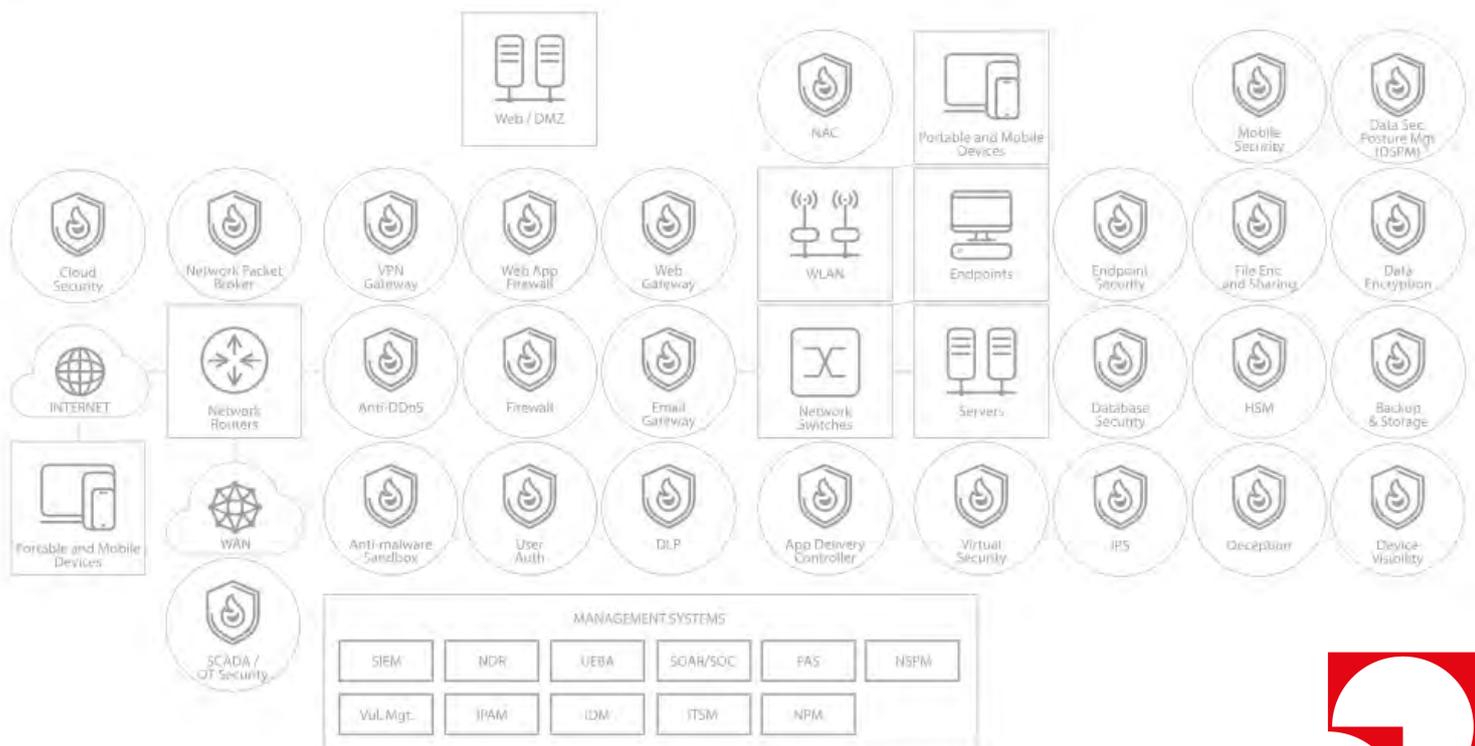

Igor Franc, PhD
President of **eSecurity Association**

IT SYSTEM REFERENCE ARCHITECTURE

We provide you with a guide developed by CLICO experts to help you choose solutions in the area of network and IT security that meet high quality and reliability requirements. The scope of the study covers all the main elements of the modern ICT system.
